

University of Dhaka
Affiliated Engineering College
Department of Computer Science and Engineering
In-course - 01

Course Code : CSE 1101
Time : 1.00 hour

Course Title : Fundamentals of Computers and Computing
Marks : 20

1. Define software. What is the concept of multitasking in an operating system? How is it different from multiprocessing?
2. Differentiate between primary memory (RAM) and secondary memory. Explain the working principle of a Hard Disk Drive (HDD).
3. What is cache memory? Explain the concept of cache hit and cache miss and how do they impact system performance?
4. What is a computer, and what are its main components? Describe their functions.
